FIRST PRIZE

THE

SILVER MEDAL

Of Excellence, was awarded to my exhibit of Quality Seeds, Bulbs, Vegetables, Tools, Insecticides, Garden Requisites, Etc.

BY THE

AMERICAN INSTITUTE OF THE CITY OF NEW YORK

At their Annual Chrysanthemum Exhibition, held in the Herald Square Exhibition Hall, New York City, October 31 to November 3, 1905

Then let the gard'ner mark with care

The kind of stocks, and what these kinds will bear.

-Dryden

Bed of Single Trumpet Narcissus, with Tulips in the background

Announcement

N issuing this our Annual Catalogue of bulbs and seeds for the fall of 1906, we have instituted a change which may seem radical, that is, we have divided the bulb classes into two sections, as follows:

SECTION 1.—Bulbs best adapted for planting and bedding outside, for outdoor

flowering and adornment, either in formal or informal arrangement, or for naturalizing or acclimatizing.

Boddington's
Bulbs
Bloom!

SECTION 2.—Bulbs best adapted for growing inside,—that is, for forcing and flowering in the greenhouse, conservatory or sunny window.

This will dispel any confusion that may arise in the mind of the prospective purchaser as to the adaptability of any bulb for planting outside or for growing inside, although many are useful for both purposes, and are thus indicated as nearly

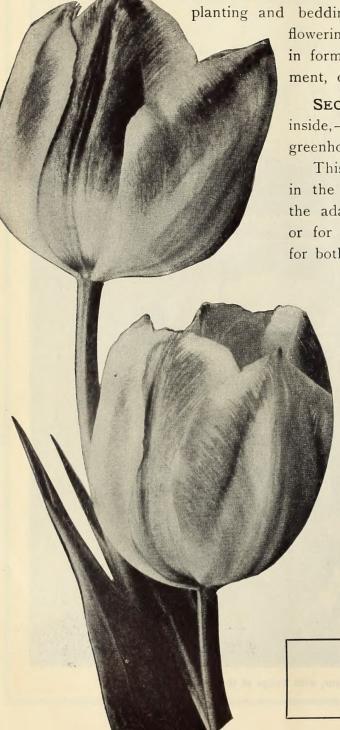

as possible; some varieties appearing in both Sections 1 and 2. The quality of the bulbs and prices are the same in both sections for the same kind of stock. The prices are different only when the sizes of the bulbs are different, and this is indicated also.

Hoping this will meet with your approval, and thanking our valued friends and customers for their past favors, we trust, in the future, to be still further in receipt of your kind commands, and a continuance of the same. Rest assured that it is always our endeavor to send out only Quality Stock, as heretofore, and remember that

BODDINGTON'S BULBS BLOOM

"Who lobes a garden

Lobes a greenhouse too"

SECTION I. BULBS FOR OUTDOOR PLANTING

BODDINGTON'S BULBS

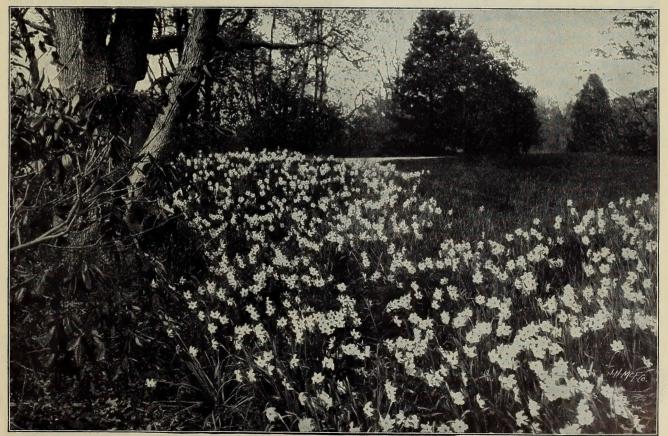

for Naturalizing and Acclimating in Lawns, Meadows, Wild Gardens and Woodlands

THE ART OF THE LANDSCAPE GARDENER, in laying out and beautifying the home grounds, is to make the place Nature's garden all the year round, every month in the year. Some, however, overlook the fact of planting perennial bulbs, that is, hardy bulbs that will flower from year to year, multiply, and increase, so that they have the appearance of part of the landscape that has stood for years. To gain immediate effect, bulbs should be planted liberally. Beautiful and natural effects may be produced by planting many of the hardier kinds of spring-flowering bulbs in masses among trees, in the herbaceous border, or around and among clumps of shrubbery or even in the edges of lawn or pasture. Only such bulbs as are perfectly hardy, and when once planted will flourish and increase from year to year without further care, should be employed.

The following varieties are among the hardiest and most attractive for naturalizing in this manner:

BODDINGTON'S QUALITY SINGLE LATE OR MAY-FLOWERING TULIPS

For Herbaceous Borders and Among Formal Borders of Shrubbery, etc.

It is surprising that these grand Tulips have not been more largely planted. As an early display they are magnificent in their beauty and coloring, coming into flower as they do, from May 15 to the first week of June, according to the season, and are most useful from a decorative point of view, after the early-flowering Tulips are past. The colors are various, as described in the following varieties, and their height, after being well established, reaches nearly three feet in some types. After planting they need not be disturbed for years and fill in the space until spring plants can be set out in the beds. There are many more beautiful late-flowering Tulips, but the following are a few of the most distinct varieties. No pretentious garden, or public park where flowers are grown extensively under appropriate surroundings, should be without a selection of them, for they afford immense enjoyment to large numbers of people, as we know from experience.

Bizarre Tulips. Handsome, rich flowers, with yellow ground, feathered or striped with crimson, purple and white; finest mixed. 30 cts. per doz., \$1.25 per 100, \$10 per 1,000.

Bybloems. Beautiful late Tulips, with white ground, blotched, striped or feathered with lilac, purple, violet, blue or black; finest

mixed. 35 cts. per doz., \$1.50 per 100, \$14 per 1,000. **Bouton d'Or.** Has deep clear yellow, globular medium-sized blossoms, with curious black-anthered stamens. When massed by

itself it strikes a very pleasing and cheerful note in any general color effect. 35 cts. per doz., \$1.50 per 100, \$14 per 1,000.

Darwin. Very large flowers of good shape, on tall, strong stems; for brilliancy of color they surplished. They include every known choice from the lightest tips to the brightest have every known shade, from the lightest tint to the brightest hue; the effect of a bed of these is dazzling; finest mixed. 40 cts. per doz., \$2 per 100, \$17.50 per 1,000.

Bridesmaid. A beautiful reddish violet, delicately striped. 40 cts.

per doz., \$1.75 per 100, \$15 per 1,000.

Beauty of America. Pale yellow, passing to white; exceedingly handsome. 35 cts. per doz., \$1.50 per 100, \$14 per 1,000.

Isabella, or Shandon Bells. This also is one of those varieties of which a description fails to give a correct idea of its beauty. The petals are a rose color flushed or flaked with white when they first open, and after two or three days it changes to a suffused deep rose and red color. It remains longer in good bloom than a great many other Tulips, and stands well when cut. 40 cts. per doz, \$2 per 100, \$17.50 per 1,000.

Retroflexa. This variety has light yellow flowers with the petals long pointed and elegantly recurved. Miss Gertrude Jekyll, the gifted English horticultural writer, in her charming book, "Wood

and Garden," pays high tribute to this Tulip. It usually flowers about the second week in May, and a little in advance of most of the late Tulips. 50 cts. per doz., \$3.25 per 100, \$30 per 1,000.

Gesneriana spathulata, or major. This variety has long been in cultivation. The beautifully curved flowers are brilliant scarlet, with a bluish black center, on tall stems. A large group of this Tulip massed by itself looks very striking. There are a number of forms of this Tulip lately sent out, and a few of them are very high priced but hardly one of them aveal the type in genuing high-priced, but hardly any of them excel the type in genuine

beauty. 40 cts. per doz., \$2 per 100, \$17.50 per 1,000.

Gesneriana macrospila. Crimson-scarlet, black and yellow center. 30 cts. per doz., \$1.25 per 100, \$10 per 1,000.

Golden Eagle. Is a showy and attractive variety, with a rich deep yellow color, and the petals edged and tinged with red. It blooms about the same time as Gesneriana major. It forms a pleasing combination with the latter, and when grouped so that they meet in curving lines they give a fine color effect. 35 cts. per doz., \$1.75 per 100, \$15 per 1,000.

Maiden's Blush, or Picotee. Clear white, margined on the edge with pink. The flower is beautifully curved, but it is somewhat difficult to give a correct idea of the color. When it opens, the petals are white and margined or penciled with pink to cerise. After two or three days the flowers change to a deep rose, and unless one is acquainted with it, it would not be recognized as the same Tulip. It stands remarkably well when cut, and a vase gracefully arranged with it would grace the table of the most dignified monarch. 40c. per doz., \$2.25 per 100, \$20 per 1,000. (See illustration on page 6.)

Boddington's "Quality"
Superfine Mixture Mayflowering Tulips, for acclimating and for planting in herbaceous or shrubbery borders. 40 cts. per doz., \$2 per 100, \$15 per 1,000.

Single Late May-flowering or Decoration Day Tulips.

BODDINGTON'S BRILLIANT TULIPS

FOR FORMAL BEDDING

The difficulty experienced by amateurs in choosing suitable colors of hyacinths applies equally to Tulips. We have, therefore, selected a number of distinct Tulips, and offer them below

in separate classes and colors.

There is, however, one important difference between hyacinths and Tulips. Under similar treatment most Hyacinths flower about the same time, while Tulips come into bloom at successive periods. This divergence has frequently been the source of much disappointment, for in a bed (or even a vase or pot) planted with different Tulips, one variety may be overblown before others show their colors. Our "Brilliant" Tulips dispose of this difficulty, as the classes have been arranged not only to ensure suitable colors, but also to flower simultaneously. By ordering from the subjoined list, customers may depend on having their beds in full beauty at one time.

Although there are hundreds of varieties of Tulips, comprising innumerable colors, shades and combinations of markings and all adapted for garden planting, yet for brilliant bedding effects the solid brilliant colors are usually preferred, especially for design bedding. For this reason we give opposite a list of the sorts usually chosen for such purposes, that can be sold sufficiently low to enable them to be used in quantity. A pretty style of bedding out Tulips and hyacinths now much followed is to cut a narrow graceful design out of the sod—bows, festoons, crescents and more intricate designs may be followed. The green grass makes an effective setting, and a comparatively small number of bulbs

used in this style makes a fine show.

We offer these "Brilliant Bedding Tulips" to induce larger plantings this fall. We will supply 250 bulbs of one variety at the 1,000 rate, 25 at the 100 rate.

The figures following the varieties indicate earliness in flowering: No. 1 being the earliest; No. 2 following; No. 3 being still a little later, but come into bloom before the No. 2's are out. The height is indicated by "D" for dwarf, "M" for medium, and "T" for tall. About 6 inches apart each way—or about 36 bulbs to the square yard—is a suitable distance for planting Tulips.

Tulipa Greigi

An exceptionally handsome and distinct early-flowering Tulip. The beautifully formed flowers are of large size and of a gorgeous orange-scarlet color, so brilliant as to at once attract the attention. The plant is quite ornamental on account of its broad, spotted foliage; very choice. 20 cts. each, \$2 per doz., \$15 per 100.

Boddington's Inimitable Mixed Bedding Tulips to Color

The following mixed Tulips contain a superior mixture, but are not to be compared with the named varieties. They do not flower at the same time, but make an excellent show; varied and pretty.

Single Yellow, Red, Rose, White, Striped. 25 cts. per doz., \$1.25 per 100, \$12 per 1,000. Double Yellow, Red, Rose, White. 30 cts. per doz., \$1.75 per

100, \$15 per 1,000.

Boddington's "Quality" Superfine Mixed Tulips

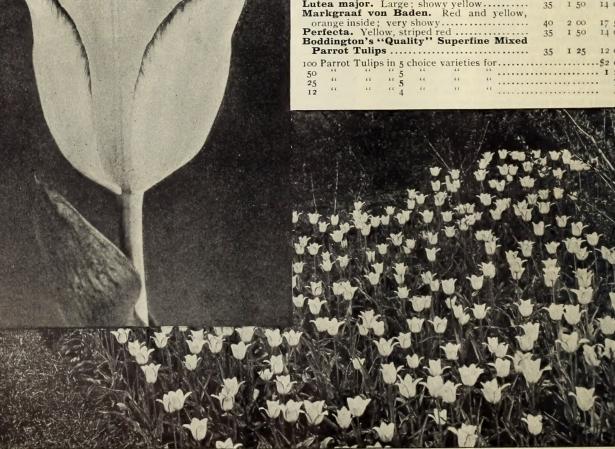

SINGLE. This mixture is made up of equal proportions of the best bedding Tulips, comprising a variation of color and shades that makes them very effective when massed in beds. 30 cts. per doz., \$1.50 per 100, \$12 per 1,000.

DOUBLE. This mixture comprises only the best bedding varieties in equal proportion and contains a splendid assortment of showy colors. 30 cts. per doz , \$1.75 per 100, \$12.50 per 1,000.

Parrot, or Dragon Tulips

NARCISSI AND DAFFODILS

For Naturalizing or Bedding

Those varieties marked with a * are best adapted for naturalizing or acclimatizing; † best for bedding.

For producing brilliant masses of striking color in the mixed border, among shrubs, under trees, or for grouping in grass, the following varieties of Narcissi are unequaled, while they specially claim the attention of amateurs for their hardiness and accommodating qualities. Clumps should be grown in odd corners to furnish flowers for decorative purposes. When cut just as they begin to expand, the flowers develop their full beauty in water as perfectly, and retain their brightness for as long a period, as when allowed to remain on their own p ants. Pansies, myosotis, scillas, and other low-growing plants and bulbs make lovely companions for these popular Narcissi.

Polyanthus Narcissi

The Polyanthus Narcissus, so called from its having a number of flowers borne on one strong stem in the same manner as a Polyanthus. Its exquisite fragrance and pleasing colors make it a suitable companion to hyacinths, tulips, etc. Should be grown extensively for its general decorative value, and to furnish an abundant supply of flowers for cutting.

Narcissus Jonquilla, or Jonquils

For their exceeding beauty and delicious fragrance Jonquils are justly prized for borders. Jonquils are admirable as woodland flowers and should be largely grown in suitable spots. They are also adapted for embellishing the banks of lakes and streams. To supply decorative material for the home, groups of these bulbs may be freely planted in odd corners. The flowers are exceedingly graceful and effective in vases.

SECTION I, continued

Boddington's Superlative Bedding Hyacinths

Bedding Hyacinths should be planted about 8 inches apart each way—or, say, 20 to the square yard—and 4 or 5 inches deep, reckoning from the top of the bulb. The actual number requisite for a given area, however, must be determined in every instance by the local conditions and the object in view; a large bed in the distance need not be so closely planted as a small bed in the immediate foreground, and of course a smaller number will be necessary in either case if a ground-work such as Myosotis, Silene or Arabis be provided. Hyacinths planted alternately with Narcissi produce a very striking effect, and for this combination 6 inches from bulb to bulb is a suitable distance.

RED HYACINTHS

Boddington's Superlative Scarlet. Finest selected bulbs. 75 cts. per doz., \$5 per 100.

Boddington's Superlative Pink. Finest selected bulbs. 75 cts. per doz., \$5 per 100. Boddington's Superlative Light Rose.

Finest selected bulbs. 75 cts. per doz., \$5 per 100.

BLUE HYACINTHS

Boddington's Superlative Blue. Finest selected bulbs. 75 cts. per doz., \$5 per 100. Boddington's Superlative Light Blue. Finest selected bulbs. 75 cts. per doz., \$5

Boddington's Superlative Dark Blue. Finest selected bulbs. 75 cts. per doz., \$5 per 100.

WHITE HYACINTHS

Boddington's Superlative Pure White. Finest selected bulbs. 75 cts. per doz., \$5 per 100.

Boddington's Superlative Blush White. Finest selected bulbs. 75 cts. per doz, \$5 per 100.

Boddington's Superlative White. Finest selected bulbs. 75 cts. per doz., \$5 per 100.

Single Hyacinths produce finer spikes, and are altogether more reliable and showy in the open ground, than double varieties; hence the above list includes none but singles. For extensive conservatory or greenhouse decoration these Hyacinths will give great satisfaction to those who do not wish to incur the expense which is unavoidable for a large selection of named sorts.

CHEAPER BORDER HYACINTHS ARE OFFERED AS FOLLOWS:

The following Hyacinths, although offered at very low prices, have all been imported by us from Holland this year and can be strongly recommended for their high quality. They are specially adapted for groups in borders and shrubberies, where they will give a brilliant display of very handsome flowers; but for beds, where simultaneous flowering and uniformity of shade are of importance, we recommend the Superlative Hyacinths offered as above.

JAPANESE IRIS

(Iris Kaempferi)

The Japanese Iris is the most showy and strikingly beautiful of all the large family of Iris; and very few flowers, the orchid not being excepted, surpass this unique flower in size and gorgeousness and variety of color, which ranges from snow-white to the deepest purple, striped, variegated and multicolored in the greatest profusion of coloring.

The collection which we offer below is **American grown**, thoroughly acclimated and hardy and true to color and name, which is rarely evident in the imported Japanese stock.

The plants we offer are furnished with four to five shoots, and all will flower the first season after planting, guaranteeing an immediate and showy effect. Delivery can be made now (September), or any time desired. Early fall planting is recommended, however, as it gives the plants an opportunity to get established before frost arrives.

The Japan Iris will succeed anywhere in a good rich soil, though a moist position is preferable.

Blue Jay. Sky-blue, with deep blue edge and white veins.

Shadow. Intense deep purple.

Mahogany. Rich dark maroon.

Gold Bond. Early-flowering; white, with yellow base and petals.

Exquisite. Light blue, veined with purple; very distinct and pretty.

Pyramid. Azure-blue, lightening to center.

Souvenir. Rosy mauve, distinctly veined with blue; very large flower.

Iris Kæmpferi, Mrs. C. T. Saxton

Senator Lexow. Deep rich purple; an enormous flower; one of the best.

Prince Camille de Rohan. Dark purplish blue.

Robert Craig. French gray, with light center and purplish veins.

Mrs. C. T. Saxton. Large double white; very fine and chaste. (See illustration.)

Price, 25 cts. each, \$2.25 per doz., \$15 per 100, \$120 per 1,000. 25 at 100 rate, 250 at 1,000 rate. Or, the set of the above 11 varieties, \$2.50; 3 collections, \$7.

ENGLISH IRIS

(Iris Anglica)

Large, handsome flowers...

Named varieties in 10 best sorts. 50 cts. per doz., \$3 per 100, \$25 per 1,000.

Mixed, all colors. 30 cts. per doz., \$1.50 per 100, \$14 per 1,000.

A Bed of Iris Kæmpferi (Japanese Iris)

SPANISH IRIS (Iris Hispanica)

The true value of the Spanish Iris appears to have been overlooked in this country. The great diversity of color and their being equally adapted for forcing for winter blooming and for massing in beds for spring flowering make them one of the most useful bulbs to plant.

Alex. von Humboldt. Dark blue.

Blanche Superbe. Pure white. Blanche Fleur. White, pale blue center. Belle Chinoise. Pure yellow.
Chrysolora. Large, bright yellow; early.

Darling. Blue; early; extra fine.

GERMAN IRIS (The True Fleur de Lis)

Perfectly hardy, and as handsome as orchids. They flourish in ordinary garden soils or in moist situations equally well. Named in the following 12 varieties:

Asiatic. Very large; deep purpleblue.

Donna Maria. White, lower petals shaded lilac.

Florentina. Very free-flowering; sweet-scented; white.

Gracehus. Pale yellow, prettily marked with purple.

Lord Salisbury. Purple and

bronze; rich.

Mme. Chereau. Pearly white,
daintily edged lavender.

Mrs. Neubronner. Deepest yel-

Othello. Intense deep purplish blue.

Penelope. White, tinged and veined with lavender.

Plumeri. Deep coppery bronze; early and free.

Spectabilis. An early and free variety; deep purple.Tineae. Large; deep blue, shaded

20 cts. each, \$2 per doz., \$12 per 100

Spanish Iris in variety

MOURNING IRIS (Iris Susiana)

In that wonderful combination of form and coloring of the rare sweet flower we call the Iris (eye of heaven) there is none so peculiarly beautiful as Susiana. It stands out in its own right as the grandest of all species. The groundwork of the flower is silvery gray, so mottled and veined and lined with dark chocolate and black as to leave one under the impression that it is only a silver lining showing through. It is hardy with slight protection in winter, blooming early in spring. No description can do it justice. 30 cts. each, \$3 per doz., \$20 per 100.

MISCELLANEOUS IRISES

German Iris

PAEONIAS

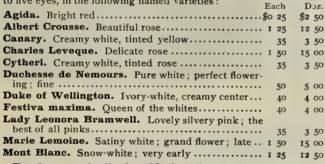

THE SPLENDID NEW PAEONY. President Roosevelt

This grand new Pæony, which originated in Holland, is now offered for the first time and was named in honor of the President as a compliment to this country-as an evidence of the friendly relations existing between the two countries, Holland and America. The color is one of the most distinct of the Chinensis typea brilliant scarlet-a color almost unknown in the Pæony. \$3 each, \$30 per doz. Quantity limited. (See illustration.)

We also offer the following Grand Collection of PAEONIA CHINENSIS

(To Name)

This type of Pæony blooms three weeks later than the Officinalis. The foliage is taller, more glossy and handsome and the flowers larger. Strong roots, three to five eyes, in the following named varieties:

Pæonia, President Roosevelt

A Cheaper Collection of Paeonia Chinensis Hamlet. Fierv red. Fragrans. Bright red. President Harrison. Deep red. Mad. Benoit. Soft red. Albert Victor. Crimson. Elegante. Pink. Pink Beauty. Bright pink.

Cleopatra. Silvery pink. La Noblesse. Fine rosy pink. Marie Hamilton. Lively rose.

Marie Louise. Soft rose. Her Majesty. Rose, light center Blushing Bride. Soft rose. Sunbeam. Rosy white. Comte de Nancy. Silvery rosy Mons. Offoy. Blush-white.

Princess May. Creamy white. Alba plena. Pure white. Queen Victoria. Snow-white. Gloria Mundi. Creamy white.

Any of the above, strong roots, 20 cts each, \$2 per doz., \$15 per 100. Or, the set of 20 for \$3

Pæonias

PAEONIA OFFICINALIS

This is among the hardiest and most popular species of the extensive Pæonia family, and is one of the commonest to be found in gardens, and the first to flower; also very sweet-scented. The varieties offered below are the most typical, and beautiful for either massing in borders or as individual specimens.

Rubra plena. Deep crimson; can be forced for Easter. 25 cts. each, \$2.50 p-r doz., \$18 per 100. Alba mutabilis. White. 40 cts. each, \$4 per doz., \$30 per 100.

Rosea. Rose; also a good forcer. 35 cts. each, \$3.50 per doz., \$25 per 100.

JAPANESE TREE PAEONIAS

Tree Pæonias, unlike the Chinese and Officinalis types, do not die down to the ground each year. They make a hard-wooded growth, and in time become quite large shrubs. The flowers range in color from pure white to the darkest shade of purple, including all the shades of crimson and pink. Double and semi-double varieties, in 12 sorts, specially selected for me by a friend in Japan, consisting of the best varieties in commerce. 75c. ea., set of 12 varieties for \$7.50, \$55 per 100.

LILIES

By ARTHUR HERRINGTON, author of "The Chrysanthemum," and a practical writer on Horticultural Subjects

The white Lily has ever been esteemed as "Flora's" emblem of purity, but the Lily family as a whole has not been accorded that popularity and prominent representation in gardens it rightly deserves.

Consider the Lilies of the fields, how they grow—American, European and Asiatic. A chain of Lilies encircles the Northern Hemisphere from the Pacific coast eastward, across this vast continent, thence through Europe and Asia, and ending only in Japan and the Philippines. Their geographical distribution is peculiar in that they are found only in northern countries, but of more importance still is the fact that they are not all hothouse plants. It may be because certain Lilies are largely grown in pots in greenhouses in great quantities every year, that our thoughts have been diverted from the true possibilities of the family as a whole as garden flowers.

A Lily garden is a glorious possibility of easy attainment, with one-half of the world paying tribute of beauty thereto. Out of the abundance of the Lily family we may make selections and suitable plantings that will ensure a complete succession of Lilies blooming from June until November,—a changing garden picture unequaled in gorgeous beauty, with the added feature of permanency in succeeding years. The cost is not prohibitive, because the majority of the best garden Lilies are plentiful and cheap, when we consider their permanent character and their subsequent increase in numbers. With a few exceptions, Lilies are grown in ordinary garden soil of average depth and fertility; in fact, many of them need no culture at all, only to be once planted and left alone for a number of years, when they may have increased to such an extent as to need lifting and replanting in reduced quantity. Look at our native Lilies—Superbum of the swamps, and Canadense of the

The Lily season in the garden opens in June, when the dwarf forms of Lilium elegans and L. Thunbergianum, numbering at least a score of distinct varieties, open their rich orange or crimson cups to the early summer's sun. Next in season comes L. bulbiferum, L. croceum, L. umbellatum, and their allies, in many shades from yellow to dark crimson. As summer advances, new kinds vary the garden scene; of special prominence being the old white L. candidum, L. longiflorum, L. Japonicum Brownii (in its several varieties), L. Chalcedonicum, L. tenuifolium and L. superbum excelsum (testaceum). In August, we have L. Henryi, with its great-branched beds of orange-yellow flowers, borne aloft from 6 to 10 feet high, a noble Lily, that will grow anywhere and increase fast. With the Tiger Lilies, and varied forms of L. speciosum to carry on the flowering till chill autumn days, it is apparent that we may have five months of Lily bloom in changing loveliness, and all easily grown kinds. These, too, will awaken a desire to attempt the culture of some that demand extra care or special treatment, like the pretty pink Krameri, the golden Auratum, or the giant L. giganteum.

Whilst Lilies are beautiful anywhere, they may be doubly so by planting in special associations; for example, among rhododendrons or other shrubs, not too thickly planted, they are actually improved, enjoying a partial shade to their roots. Lilies, and pæonies too, make an admirable combination, the one succeeding the other in blooming, and both mutually helpful to each other. Make a great bed or border by deeply digging and manuring the soil; then plant it with Lilies and pæonies, and you have made a planting that will grow into a floral feature that need not be changed or disturbed for ten years.

Lilium candidum (Annunciation, or Madonna Lily)

The gorgeous Lilium auratum, or Golden-banded Lily of Japan

HARDY JAPANESE LILIES

For Outdoor Planting, or Growing in Pots for Summer Flowering

Nearly all the Lilies which are cultivated in pots for conservatory and greenhouse decoration are also well adapted for growing in the open ground, and in suitable soil they make an imposing display. The following varieties are generally recognized as border flowers,

and with good reason, for the most inclement winter does not injure them. If left undisturbed, they present an increased number of flowers for several seasons. All the following varieties of Lilies do grandly in pots for conservatory decoration in the summer months. For cultivation of Lilies outdoors, see page 16.

Lilium Auratum

Golden-Rayed Lily of Japan Monstrous pure white flowers, thickly

studded with crimson spots, each petal marked with a wide gold band. A good forcer and excellent for outdoor effect, being perfectly hardy.

White ground, spotted rose on each petal; very handsome.

Various Japanese, European and American Garden Lilies

Culture of Various Garden Lilies. A deep, moist, rich loam is necessary for Lilies. A stubborn clay may be improved for them by deep digging, and incorporating with the staple plenty of decayed manure and leaf-mold. They all thrive in peat, or rotten turf, or indeed in any soil containing an abundance of decomposing vegetable matter. They should be planted deep for their size, never less than 6 inches. When they have stood some years, they should be taken up and parted, and the borders must be deeply dug and liberally manured before replanting.

By A LIBERAL planting of the various Lilies HERE ENUMERATED, a succession of Flowers can be obtained from EARLY SUMMER until FROST.—A. T. BODDINGTON.

Other Choice, Rare and Beautiful Lilies

Alexandrae, A magnificent new hybrid Lily from Japan; dwarf

habit; flowers large, pure white, widely expanded, of great substance and very beautiful. July. 2 ft. \$2.50 each, \$25 per doz.

Bolanderi (The Oregon Lily). Somewhat like L. Grayii; deep crimson-red, with dark spots. June, July. 3 ft. \$1.50 each, \$15

Bulbiferum. True species. Dark red flowers. June. 1 ft. 30 cts

each, \$3 per doz., \$20 per 100.

Candidum fl. pl. (The Double White Annunciation Lily). A grand acquisition. Very rare. June, July. 4 to 5 ft. 40 cts. each, \$4 per doz., \$30 per 100.

Colchicum (Monadelphum or L. Scovitzianum). Bears 12 to 20 bright golden yellow reflexed flowers. This is a grand Lily, and considered the equal of L. auratum. July. 3 to 5 ft. 30 cts. each, \$3 per doz., \$20 per 100.

Concolor (Sinicum). Bright scarlet, with dark red spots. A dwarf and lovely miniature Lily. Increases rapidly. July. 1 to 11/2 ft.

30 cts. each, \$3 per doz., \$20 per 100.

Croceum. A beautiful orange Lily; grand and easily flowered.

June, July. 3 to 5 ft. 25 cts. each, \$2.50 per doz., \$15 per 100.

Elegans Bicolor. Bright red, flushed orange. 20 cts. each, \$1.75 per doz, \$12 per 100.

Elegans, Painted Chief. Bright flame color. 25 cts. each, \$2.50

per doz., \$15 per 100.

Elegans Robusta. Orange, spotted black. 20 cts. each, \$1.75 per

doz., \$12 per 100.
Elegans Aurora. Orange, suffused scarlet. 25 cts. each, \$2.50

per doz., \$15 per 100.

Elegans, Mixed. 15 cts. each, \$1.50 per doz., \$10 per 100.

All the Elegans Lilies are dwarf and early June-flowering.

Excelsum (better known as Lilium testaceum). A stately Lily,

free-flowering, bearing six to twelve flowers of beautiful nankeenyellow. One of the grandest Lilies in cultivation. June, July. 4

Giganteum. The noble Himalayan Lily; when established grows to t4 ft., bearing numerous long, tubular flowers of white, streaked inside with purple; very handsome foliage. We have secured an excellent lot of bulbs that will flower the first year. July, August. \$2 each, \$20 per doz.

Lilium sulphureum

Lilium Henryi (See page 16) Photograph by Arthur Herrington, in the "Garden Magazine"

Grayii. A beautiful American Lily; flowers bell-shaped, dark, rich red, spotted purple; very free. July. 4 ft. 25 cts. each, \$2.50 per doz., \$15 per 100.

Martagon album (The White Martagon). A beautiful chaste Lily, carrying 20 to 30 pure wax flowers upon stems. 4 to 5 ft.

\$1.50 each, \$15 per doz.

Parryi. Color citron-yellow, spotted with light chocolate-brown, and yields a luscious perfume, but not so powerful as L. auratum.

July. 3 to 4 ft. \$1.50 each, \$15 per doz.

Philadelphicum. A very pretty Lily, bearing two to five flowers, cup-shaped; base of petal yellow, maroon spotted; tips of petals

bright scarlet. July. 1½ ft. 25 cts. each, \$2.50 per doz., \$15 per 100.

Philippensis. This rare and beautiful Lily is a native of the mountains of the Philippines. The flowers, pure white, are long and tubular as the L Harrisii, but more tapering and trumpet-shaped; delicately fragrant. July. 31/2 ft. 35 cts. each, \$3.50 per doz.,

Sulphureum (Wallichianium superbum). A grand new Lily, with tubular-shaped flowers, rich yellow inside, rosy brown tinted outside. Should be grown by all lovers of Lilies. September. 6 ft.

\$2 each, \$20 per doz. (See illustration.)

Snowdrops Growing in the Grass

MISCELLANEOUS BULBS

For Outdoor Planting, Naturalizing in Beds or Borders, or for interspersing with other Bulbs, as Narcissus, Hyacinths, etc.

CROCUSES

All lovers of a garden are familiar with the brilliant display which can be obtained from Crocuses in the opening days of spring. The planting may be in groups or lines of distinct color, but in every instance a massive effect should be aimed at. It only fritters away the bulbs to plant singly or in small numbers, and they are so cheap as to justify their lavish employment.

producing in abundance large, single, semi-double and double flowers 3 to 5 inches across, of an endless variety of colors, from maroon and brightest scarlet to flesh-pink, and from lilac to purple. Some are mottled, striped, ringed, etc. For cutting they are unsurpassed, and in the garden they flower until after frost ...

CHIONODOXA (Glory-of-the-Snow). The most beau-tiful of dwarf blue spring flowers, resembling those of Scilla Sibirica, but larger, slightly taller, and more handsome. The Chionodoxa is very hardy, thriving in any ordinary garden soil and in almost any situation. The bulbs continue to flower from year to year. It is also excellent for forcing. Doz.per 1,000, \$10..\$0 25 \$1 25

Sardensis. Intense deep blue..... Gigantea. Unusually large flowers of lovely lilac-blue, with conspicuous white center.....

CROWN IMPERIALS (Fritillaria imperialis). Many of the named Crown Imperials vary so little in color and in general appearance that it is difficult to distinguish the difference between them. The following are the most distinct varieties, the flowers ranging from pure yellow to deep shades of orange and reddish buff. Although the bulbs succeed fairly well in any ordinary border, a rather strong, adhesive soil, in an open position freely exposed to the sun, should, if possible, be chosen for them. Doz. 160 Good Varieties, to name. \$1 25 Good Varieties, Mixed. 1 00 **\$8** oo

Other Fritiliarias are offered below

DIELYTRA spectabilis (Bleeding Heart). One of the most ornamental of hardy spring-flowering plants, with elegant green foliage and long drooping racemes of heartshaped flowers. This is deemed one of the finest of all hardy garden plants. Ready in November. Magnificent racemes of pink and white flowers. 15 cts. each, \$1.50 per doz.

ERANTHIS hyemalis (Winter Aconite). The Winter Aconite is the very "firstling" of the year, covering the ground with gilt spangles in the bleakest days of Feb-Any soil or situation will suit this flower, and it should be planted in large patches within view from the windows. 25 cts. per doz., \$1 50 per 100.

ERYTHRONIUM (Giant Dog's-tooth Violet). Beautiful plants, perfectly hardy; the foliage is plants, perfectly nardy; the foliage is usually charmingly variegated, and a mass of fifteen or twenty plants is a pretty sight even when not in flower, but when the graceful flowers are in bloom the effect is matchless. The plants luxuriate in rather moist, partially shady positions and do very nicely when grown in pots for winter blooming.

Americanum. Large cream-colored flowers with ma- Doz. roon band at base; leaves richly mottled; six to ten

FRITILLARIAS. These bulbs are perfectly hardy and thrive in shaded borders, where they may remain undisturbed for at least three years. The nodding bellshaped flowers vary in color, and as a rule are handsomely spotted.

Assortment of Choice Named Varieties\$0 75 \$5 00 Mixed Colors 3 00

Muscaria, or Grape Hyacinths

FEATHERED, GRAPE AND MUSK HYA-

CINTHS. These Hyacinths will grow in any good garden soil and are admirably adapted for borders that are shaded by trees. They should be planted in large clumps and be allowed to remain several years undisturbed. They are all beautiful-the Feather Hyacinth emphatically so. For delicacy of structure it has peculiar claims to our admiration, when presenting its feathery plumes a foot or more in length, cut into curling threads of the most elegant tenuity.

Muscaria plumosa. Beautiful Feathered Hyacinth.. \$0 35 \$2 00 botryoides alba. White Grape Hyacinth.. 25 botryoides coerulea. Light blue Hyacinth botryoides monstrosus. Giant blue Hyacinth 2 00 racemosum. Blue starch Hyacinth...... 35 2 00 moschatus major (Musk Hyacinth), Grav-2 00

LEUCOJUM. Produces flowers like monster snowdrops; very graceful in growth, having the delicate fragrance of the violet. It is one of our earliest spring flowers, with white blossoms distinctly tipped green, handsome in outline and prized for bouquets. They should be grown in quantities in the borders or in spots on the edges of shrubbery, where they are beautifully effective, and when established produce enormous quantities of flowers.

Vernum (Spring Snowflake) \$0 25 \$1 50 \$12 00 Aestivum. A snow-white flower resembling

the snowdrop, but much larger..... 40 2 25 20 00

LILY-OF-THE-VALLEY. Large clumps of Lily-of-the-Valley for outside planting and naturalizing. These clumps will throw from fifteen to twenty spikes of flowers. \$3 per doz., \$22.50 per 100.

Eremurus Himalaicus

TRITELEIA uniflora (Spring Star Flower). A perfect little gem for pot culture. It flowers in very early spring months. The bulbs are

SECTION I, continued MISCELLANEOUS BULBS FOR OUTDOOR PLANTING

EREMURUS Himalaicus. Majestic, tuberous-rooted plant A noble ornament in flower garden or on the lawn. The individual flowers, of peach-pink color and very fragrant, are closely arranged on stately spikes 6 to 10 feet high, forming a magnificent column of bloom during June and July. Give a sunny position, sheltered from gales; plant the tubers in the fall, while dormant, and set about 8 inches deep. Although hardy, it will be safer in northern states to protect with 4 or 6 inches of leaves, straw, manure or similar covering, to prevent the young growth, which starts very early, from being tipped from late freezes. Strong flowering roots, ready in November. \$1.25 each, \$12 per doz.

RANUNCULUS, Boddington's Giant. Gorgeous dwarf flowers, easily grown in pots for winter blooming, or in coldframes for spring. Eight roots may be potted in a 6-inch bulb-pan; they should be covered one inch. The colors include shades of white, yellow, crimson and purple, some being almost black. They are very effective for decoration, either as pot-plants or cut.

Double Persian. Mixed colors	2	20 I 00
Double Turban. Mixed co'ors	2	20 I 00

SCILLA praecox (Sibirica). The Blue Squill is perfectly hardy and should be largely grown in the open border in conjunction with snowdrops. It is also valuable for small beds and for making marginal lines in the geometric garden. 30 cts. per doz., \$1.75 per 100, \$15 per 1,000.

SPIRAEA palmata. The beautiful deep pink hardy Spirea. An excellent companion for the white varieties. (See page 33.) 25 cts. each, \$2.50 per dcz., \$15 per 100.

TRILLIUM grandiflorum (Great American Wood Lily). Most beautiful American plants. Perfectly hardy, growing and flowering pro-

fusely in partially shaded nooks about the lawn, under trees, etc. If grown several in a pot, it makes one of the best winter flowers. The flowers are large, of the finest white, changing in a few days to soft rose. 80 cts. per doz., \$6 per 100.

Trillium grandiflorum

grown in a pot. It grows about 6 to 8 inches high, each bulb producing several pretty starshaped flowers of a delicate milky white, suffused with blue and emits the perfume of primroses. They are perfectly

small, and several should be

hardy, and grown in quantities in a sunny border or for edgings they are very effective. 15 cts. per doz., 75 cts. per 100, \$6 per 1,000.

Lilac, Charles X

FORCING SHRUBS

ACACIA PUBESCENS
I can supply a limited number of this, the most beautiful of all Acacias. It is extremely scarce, being difficult to propagate.

5-inch pots, about 3 feet high, 4 years old, feet high, 4 years old,

AZALEA MOLLIS

Used extensively for early forcing; greatly in demand on account of their brilliant colors; perfectly hardy. Strong plants, 1½ feet high, about 30 buds, \$1.25 each, \$12 per doz., \$75 per 100.

DEUTZIAS Gracilis. Pot-grown, from 6-inch pots, \$4 per doz., \$30 per 100. Lomoinei. Pot-grown, from 6-inch pots, \$4 per doz., \$30 per 100.

HYDRANGEA OTAKSA One of the most useful of forcing plants for Easter or for summer decoration, blossoms. Field-grown plants, five to six branches, 50 cts. each, \$5 per doz., \$40 per 100. Price of specimens on application.

LILACS (Pot-grown.). Strong plants, finely set with buds, extra-selected, November delivery. Do not confound this stock with the cheap grades so largely shipped on consignments to dealers in this country.

"Quality" Collections of Bulbs for the Open Ground

A catalogue, no matter whether it be of bulbs or any other commodity, is useful only to those who know the "vernacular"—so to speak,—and so for those who are not so well posted and for those who have "not the time" or the knowledge to select the most useful bulbs. For their adaptability to their ideas and wants, we take pleasure in offering the following collections, which have been selected with due care and comprehension as to their utility and for ensuring the finest possible display for the amount quoted.

If you are still in a quandary as to which are the best bulbs adapted to your grounds, and you will write us the size of beds, borders, etc, you wish to plant, sending a rough sketch, quality and state of soil, time wanted to flower, etc., we are in a position and will write you cheerfully as to the best varieties, methods of panting and any detail you may desire, providing we are favored with your order.

Bed of Hyacinths and Tulips in Central Park, N. Y. City

The Secret of Bulb Culture

By WILHELM MILLER, Editor of the "Garden Magazine"

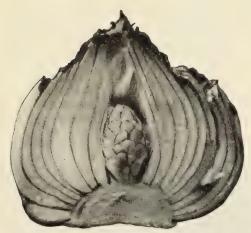

VERY year we Americans spend about two million dollars for bulbs, without realizing the one fundamental fact about them that makes for quality. While we can increase the size of the flowers and profoundly affect the depth and purity of their colors by cultural skill, all the time, money and loving care that we bestow upon them will never increase the *number* of flowers.

That is all determined when we buy the bulbs.

To convince ourselves of this, all we have to do is to cut open a bulb and, if we have patience and a good magnifying glass, we can count every blossom which that bulb had the possibility of making.

The moral is obvious: pay more and get better bulbs. For there is no comparison between the pleasure

Hyacinth bulb, showing embryo flower buds

one gets out of a bulb that gives us one solitary daffodil and a bulb that produces three to five of these glorious golden trumpets, each flower of which measures four inches across.

The kind of crocuses you buy usually produce only two or three flowers. A first-size crocus bulb should measure three inches in circumference and produce four to six flowers. And so it goes. You may lavish daily care for months upon an ordinary hyacinth bulb and you will never have anything that you can show with pride to your neighbors. But think of a hyacinth with eighty-three bells! That would be something to exclaim over. You wouldn't have to apologize to your callers for the condition of your flowers. You wouldn't have to "wonder why" they were not better. The "secret" of bulb culture is that charming little mystery wrapped up in the heart of every bulb—the number of flowers it intends to show.

How can one tell a quality bulb? As a rule, the bigger the bulb, the more the flowers and the higher the price, but—that isn't all! You want a bulb that is heavy for its size. It is the solid, close-grained bulb that has the hardiness to resist wet and cold; it is the loose, sappy one that falls an easy prey to disease.

The other secret of bulb culture is to get a wonderful root growth in the fall before the stem begins to shoot up. A cool, dark place will fix that. Bulb culture is really "too easy." Beginners do sometimes fail, but that is usually because they put the bulbs in too heavy soil. Bulbs have one weak point. They are sensitive to stagnant water. Put a little sand under each bulb, if you are in doubt, or, better still, throw out the heavy soil to the depth of two feet, put in a layer of broken bricks or stones for drainage and fill in with good soil.

And so I say the real secret of bulb culture is to buy the very best bulbs. It costs the Dutchmen more to raise first-class bulbs than ordinary bulbs, and we can never expect to have quality flowers unless we pay a fancy price. The price of bulbs is too cheap in this country. Our standards are too low. The prices of general merchandise have advanced all along the line. (Everybody knows that. We all know that the cost of living is higher.) Bulbs and seeds and plants have not advanced, but they must, because our standards are advancing. The American people want the very best of everything, and they are willing to pay for it if the thing is so much better that every one can see it at a glance.

SECTION II

Bulbs for Growing and Forcing Under Glass, in the Greenhouse, Conservatory or Sunny Window

LILIES

Lilies should be potted immediately upon receipt if intended for growing in pots or for forcing. The soil should be rich, the pot well drained. The bulb should be set about half-way below the surface or rim of the pot and lightly covered with soil. After potting, give a thorough watering and set outside in a coldframe or shady situation; then cover with ashes or long straw. After they have stood from three weeks to a month, bring into the house, fill pot with soil and force gently. After showing buds, a higher temperature may be used.

Lilium Jamesii

This is a new Lily raised by Mr. R. H. James, of Bermuda, and is an intermediate cross between Lilium Hurrisii and the Bermuda Lilium longiflorum. It resembles more the Lilium Harrisii, which it more nearly approaches in habit of plant and form of flower, inasmuch as the flower is nearly as large as Harrisii and much larger than Longiflorum; the flowers, too, are thicker in petal and of much more substance, making it an excellent Lily for shipping purposes. It is also practically free from disease. Last year we secured only five cases of 7- to 9-inch bulbs (1,000). We sent a case each to five leading growers, who were so pleased with its appearance and growth, which was even (all starting at the same time), that they are all taking a large stock this season. Not one reported that he had thrown out more than ten, from all causes, others a good deal less. Owing to draught in Bermuda this season, and there being a shortage of nearly 50 per cent in the larger sizes of Harrisii, this Lily (Lilium Jamesii) will make an excellent substitute.

Lilium Jamesii

Lilium Harrisii, or True Bermuda Easter Lily

This Lily is so well known that it is scarcely necessary to expatiate upon its merits here. It is undoubtedly the best indoor winter-blooming Lily in existence, and can be so easily handled that it may be had in bloom by a succession of planting from early in December until Easter. We have this year made arrangements with one of the most reliable growers in Bermuda to take his crop, and from past experience have full confidence in recommending this stock most highly, knowing that it contains a very much smaller proportion of diseased bulbs than those usually sent to the New York market. Bulbs ready for delivery in September. The prices of my "Quality" Lilium Harrisii are:

Lilium Longiflorum Multiflorum (Japan-Grown) BODDINGTON'S EARLY, or EASTER-FLOWERING

This magnificent Lily is almost identical with *Lilium Harrisii*. The only difference is that it flowers somewhat later and is, therefore, most useful for a continuation of bloom. The flowers are large and of great substance, and can be depended upon for Easter decorations. Bulbs ready for delivery in October.

Lilium Candidum (St. Joseph, or Annunciation Lily)

This is the old-fashioned garden Lily. It is perfectly hardy, blooming in the open ground in June. The many snow-white flowers borne on a stem 3 to 4 feet high make this Lily most effective. Very large bulbs, ready for delivery in September. 15 cts. each, \$1.50 per doz., \$7.50 per 100.

SELECTED NAMED DUTCH HYACINTHS

CULTURAL DIRECTIONS

Hyacinths in Pots. It is important in the pot culture of Hyacinths to have rich, light soil; if possible, a compost, one-third decayed turf, one-third old rotted cow manure, and the remainder equal parts sharp sand and leaf-mold. This compost should be made a few turf, one-third old rotted cow manure, and the remainder equal parts sharp sand and leaf-mold. This compost should be made a few weeks before being used. If the bulbs are to be potted singly, pots 5 inches in diameter are the proper size. Cover the hole in the pot with a piece of broken pot, and over this place a layer of moss, which will keep the soil from clogging the drainage thus provided. Break off any offsets which appear at the base of the bulbs, and, in potting, place each bulb so that its top shall be half an inch below the surface of the soil and an inch below the rim of the pot. The soil should be of usual natural moisture, and should be pressed moderately firm. The filled pots may be placed in a coldframe where there is protection from frost, and well watered. An excellent plan is to place them on a bed of moist sifted coal ashes, covering the pots to a depth of 6 inches with the same material. When well rooted, which will be in about ten weeks, the bulbs may be brought indoors and forced. For the first two or three weeks they should be kept in a temperature not exceeding 50 degrees. Success in forcing depends much on their having strong roots before being brought to the light. The top grows rapidly, and unless the roots are started much in advance they are unable to nourish the plant, and failure results.

Hyacinths for early use may be potted in September or October; late planting is not advisable, as the bulbs deteriorate. When desired for late use, it is better to pot them in October and keep them in a coldframe above freezing until it is desired to force them into

desired for late use, it is better to pot them in October and keep them in a coldframe above freezing until it is desired to force them into bloom. To obtain dwarf foliage and fine flower-spikes, Hyacinths, when being forced, should have plenty of manure-water and fresh air,

and should be kept very near the glass. The blooms last much longer if shaded from the sun.

Hyacinths in Glasses. The single varieties are, with a few exceptions, best adapted to this mode of culture. They produce finer flower-spikes than the double. Fill the glass with clear soft water, so as nearly to touch the base of the bulb, putting a small piece of charcoal in each glass to keep the water pure and afford some nourishment. The filled glasses should be placed in a dry, cool, dark place, and kept there until the roots almost touch the bottom of the glass, when they may be exposed gradually to the light. If the water in the glasses becomes foul or diminished, replace it with fresh water at about the same temperature as the atmosphere in which the bulbs are growing; otherwise it need not be changed. When well started, the bulbs should have plenty of light and air, without drafts, in order that the best development and brilliancy of color may be obtained.

Intending purchasers can rely upon all bulbs of Hyacinths being thoroughly ripened, fully up to specified size and "quality," and true to name. We offer four sizes—First and Second for indoor flowering, and Named Bedding (two sizes) offered on page 10, which are also cheaper but make an excellent show grown under glass. These are standard Holland sizes; we do not buy second size and send out as first size, and named bedding and send out as second size, which device is usually practiced by firms who make ridiculously low prices. You can rely upon the following as being exactly as stated.

Boddington's Collection of "Top Root," or "Exhibition" Hyacinths

The term "top root" is a Holland phrase, and is used to distinguish the size of the Hyacinth bulb from the first size; in fact, they are the largest bulbs selected after harvesting the crop, and are the "pick of the market." These bulbs are excellent for exhibition purposes, to grow singly in pots or Hyacinth glasses.

Boddington's "Inimitable" Collection

of Named Hyacinths

The following collection of Hyacinths will be selected by me from the list of Hyacinths, and a careful choice will be made of those varieties which are specially suitable for exhibition, and for cultivation in pots or glasses, as may be desired. Single Hyacinths generally produce finer spikes, thrive better in water and are more effective in color than the doubles, and we usually send a larger proportion of single flowers unless instructed to the contrary.

Double Hyacinth

Single Hyacinth

MR. ARTHUR T. BODDINGTON, New York City.

Dear Sir:- The bulb season which is now closing has been one in record, for quality and everything else. I believe that in purchasing the best quality of bulbs (as your firm sends out) is seventy-five per cent of the labor. You may rest assured of order again.

JAS. DONALD, gardener to W. C. Osborne. (Signed)

HYACINTHS

Boddington's "Quality" French Romans

Although the flowers of the French Roman Hyacinths are smaller than those of the Dutch Hyacinths, they can be forced much earlier into bloom, are more fragrant and bear a greater abundance of flowerspikes than the Holland-grown bulbs. These can be forced for a continuance of bloom all winter and are unsurpassed for cut-flower purposes.

Boddington's "Quality" Dutch Roman, or Miniature Hyacinths

These are small bulbs, or miniature Dutch Hyacinths, and are now very largely used for growing in pans or pots. They are also used extensively for bedding purposes, as they produce large spikes of flowers. We can specially recommend our "Quality" Dutch Romans to those who have never grown them, and therefore do not know their value. They consist of named sorts, similar to regular first size Dutch Hyacinths, of the finest grade and true to name. 12 to 15 centimeters.

We especially recommend the "fancy bulbs" of La Reine, Keizerkroon and Murillo for forcing

Narcissi and Daffodils

Narcissi and Daffodils are among the earliest-flowering bulbs, and are alike useful for cut-flowers and decorative purposes. The most useful for early forcing is the well-known Paper White Narcissus varieties Grandiflora and Multiflora. They are pure white, chaste and beautiful, and are borne on long stems, sometimes as

many as fifteen to a stem.

Cultural Directions .- Plant bulbs in shallow pans or boxes, about 2 inches apart, and store in cellar or shed till thoroughly rooted. Do not allow frost to reach them. If wanted for Christmas, bring into the light about the second week in November, and after that successively (about a month to six weeks), and you will have Narcissus in bloom till nearly Easter. For general cultivation of Narcissus under glass, see Hyacinths, page 24

Paper White Narcissus can also be grown in water with pebbles in shallow dishes and bowls, the same as the Sacred Chinese Narcissus.

Narcissus Double Von Sion

Paper White

Grandiflora. The well-known variety; large-sized bulbs. 40 cts. per doz., \$2 per 100, \$15 per 1,000.

Grandiflora multiflora. This variety is a great improve-ment over the Grandiflora; is a vigorous grower, with fine spike, which carries larger trusses, and in greater abundance than the old varieties. 50 cts. per doz., \$2.50 per 100, \$20 per 1,000.

Incomparablis fl. pl. (Butter and Eggs). Rich yellow and white; very double; good forcer or for outside. 25 cts. per doz., \$1.50 per 100, \$12.50 per 1,000

Orange Phoenix (Bacon and Eggs). Beautiful white and orange Narcissus. 30 cts. per

Sulphur, or Silver Phoenix (Codlins and Cream). Creamy white, with pale sulphur center. 50 cts. per doz., \$3.50 per 100, \$30 per 1,000.

CHINESE SACRED NARCISSUS

(Joss Flower, or Oriental New Year's Lily)

These may be grown in pots of earth, but are more interesting and very satisfactory in bowls partially filled with pebbles and water. As the roots develop they form a network about the pebbles, thus supporting the plant when in bloom. They should be started and grown in bright light, but carefully protected from drafts. The flowers are mostly white with yellow cups, and are very fragrant. Extra large selected builts, roc. each, \$1 per doz.; very large mother bulbs, 15 cts. each, \$1.50 per doz. By mail, add 5 cts. per bulb for postage.

Chinese Sacred Narcissus, as grown in a bowl

SINGLE TRUMPET NARCISSI

The commercial florists have been foremost to give the Narcissi or Daffodils the attention due them. They have learned how easily and successfully these lovely flowers may be forced into bloom during winter and how fascinating and lasting are the blossoms. They may be planted in pots or bulb pans 6 inches or more in diameter, several bulbs in each, according to size. Treat in same manner as Hyacinths.

Single Narcissus, Christmas Trumpet Major

These bulbs arrive at the same time as the Romans and Paper Whites, and, if treated in the same manner, can be flowered for Christmas. A useful and novel flower for this season of the year. 50 cts. per doz., \$2 50 per 100, \$20 per 1,000.

Narcissus Jonquilla, or Jonquils

The delicately graceful forms, delicious fragrance and deep yellow color of their blossoms have made the Jonquils favorites of the amateur and necessities with the florist. They are easily forced, and if started early may be flowered by Christmas, or even earlier.

Boddington's "Quality" Lily-of-the-Valley

Lily-of-the Valley is among the best known and most popular flowers, and is chaste and beautiful for all occasions. We make arrangements for only the best-ripened and matured three-year-old pips.

New crop Lily-of-the-Valley should always be frozen before forcing **Boddington's "Wedding Bells"** brand, being specially selected, is superior for first crop; will convince the most critical grower of its superiority over brands usually offered, for early forcing, the foliage and flower-spike being all that can be desired. \$2 per 100, \$17.50 per 1,000, \$38 per case of 2,500.

"Quality" Berlin Pips. For early forcing; strong three-year old pips; a really good Valley. \$1.75 per 100, \$15 per 1,000, \$35

per case of 2,500.

Selected Hamburg Pips. Best for late forcing; strong three-yearold, for late winter and spring forcing. \$1.60 per 100, \$13.50 per 1,000, \$32 per case of 2,500.

Lily-of-the-Valley from Cold Storage

We import large quantities of the best grade of Valley for forcing, which are put in cold storage immediately upon arrival and kept perfectly dormant. These pips can be shipped at any day of the year and can be brought into full flower in three weeks from time of planting without undue forcing, and with foliage. We recommend these for flowering before and up to Christmas. They should be potted or boxed as soon as received and be placed in a temperature of 50° or 55°. \$2.50 per 100, \$20 per 1,000.

GLADIOLUS COLVILLEI

Delivery in October and November

The "Colvillei" section should not be confused with the Gandavensis or large-flowering Gladiolus. The "Colvillei" has much more slender spikes and daintier flowers, which are very pretty for cutting and arranging in vases with ferns and other foliage. Florists often plant these in their carnation beds.

Doz. 100 1,000

Peach Blossom

A recent introduction and the most beautiful of the Colvillei type of Gladiolus. The color is a lovely soft pink, on the order of the Killarney rose. 50 cts. per doz., \$3.50 per 100, \$30 per 1,000.

CALLA AETHIOPICA (CALLA LILY)

Too well known to need description. We offer a very fine lot of dry roots, all with center shoots ready for forcing. Each Doz 100 11½ to 2 inches in diameter. \$0\$ 20 \$2\$ 00 \$15\$ 00 2 to 21½ inches in diameter. \$2\$ 2 50 20 00 Monster. \$4\$ 4 4 0 35 00

FREESIA REFRACTA ALBA

Of all South African flowering bulbs, the Freesia is doubtless the best known and most esteemed. The gracefully branched, fragrant flowers are of long duration, and, being freely produced, are profitable for commercial purposes, and satisfactory to amateurs. If planted early, they may be had in bloom by Christmas. Plant eight or ten bulbs in a 6-inch bulb-pan, covering them one inch. The peculiar habit of the Freesia, its delicious perfume and great value for cutting, have made this flower immensely popular.

The Grand New Freesia, Purity

A grand acquisition to the Freesias, and for the florist as a cutflower or pot-plant, and no one should be without a few bulbs of this delightful novelty. Flowers, which are snowy white, of large size, are borne in great profusion on long stems which grow upright and stiff; are excellent for cut-flower purposes. 50 cts. per doz., \$3.50 per 100.

SPANISH IRIS (Iris Hispanica)

The true value of the Spanish Iris appears to have been overlooked in this country. The great diversity of color and their being equally adapted for forcing for winter blooming make then one of the most useful bulbs to force late.

Alex Von Humboldt. Dark blue.
Belle Chinoise. Pure yellow.
Blanche Superbe. Pure white.
Blanche Fleur. White, pale blue center.
Chrysolora. Large, bright yellow; early.
Darling. Blue; early; fine.

IXIAS

The Ixia is a beautiful little winter-flowering bulb, with low, slender, graceful spikes of bloom. The colors are rich, varied and beautiful, the center always differing in color from the other parts of the flower, so that the blossoms, expanding in the sun's rays, present a picture of gorgeous beauty.

CROCUS (LARGE BULBS)

Boddington's "Quality" Named Crocuses for Pot Culture

The Named Crocuses present such splendor of coloring as to render them indispensable for decorative purposes in winter and early spring. Their beauty is almost too great to be durable, but a prolonged display is easily ensured by bringing forward successive batches at brief intervals.

Doz. 1000 1.000

Diff Butches at Brief moet tale.	DOZ.	100	1,000

All lovers of a garden, too, are familiar with the brilliant display which can be obtained from Crocuses in the opening days of spring. The planting may be in groups or lines of distinct color, but in every instance a massive effect should be aimed at. It only fritters away the bulbs to plant singly or in small numbers, and they are so cheap as to justify their lavish employment.

OXALIS

Lovely little bulbous plants for hanging pots and baskets. The bulbs should be planted an inch deep, six or eight in a 5-inch pot. They need a sunny situation.

Spirea, H. Witte

Crocuses grown in a pan

DIELYTRA SPECTABILIS (Bleeding Heart) November Delivery

A well-known hardy plant, bearing in spring long racemes of deep rose-pink, pendent flowers. Treat the same as spireas. 15 cts. each, \$1.50 per doz., \$10 per 100.

SPIREA, or ASTILBE

November Delivery

Spireas make excellent plants for Easter and Memorial Day decorations. They should be potted on arrival and be kept in a cellar or coldframe till about two months before they are needed.

The Grand New Spirea, H. Witte

Undoubtedly one of the finest and most beautiful Spireas for forcing. One who makes a specialty of growing Spireas for the New York market first drew our attention to this variety and pointed out the fact that if it should flower ahead of time—the flowers are passé—by cutting them away a new crop would follow; in fact, it might be called a continuous bloomer. In habit and style of flowering it is more to be compared with Spiræa Gladstone. 25 cts. each, \$2.50 per doz., \$15 per 100.

The finest race of Amaryllis in cultivation, colors varying from blush white to crimson... 1 25 12 00 Valotta purpurea (Scarborough Lily). Vivid scarlet. 30 3 00

ANEMONE. None of the spring flowers surpass the Anemone in brilliancy of color and profusion of bloom. They are very lasting, and have of recent years become very popular for cut-flower use and for table decorations. The florists now buy thousands of them to force. Plant in October or November, six roots in a 6-inch pot or bulb pan, covering them one inch. They may be kept in a cellar or frame protected from frost, until spring, when they may be placed in the greenhouse or window to bloom.

Coronaria, Single Blue. A charming variety. 25 cts. per doz., \$1.50 per 100. Single White (The Bride). Pure white. 25c. per doz., \$1.50 per 100. Single Scarlet. Very brilliant. 25c

per doz., \$1.50 per 100.

Double Ceres. White, shaded with rose, 25 cts. per doz., \$1.50 per 100.

Double Ceres Rosetti. Dark pink.

25 cts. per doz., \$1.50 per 100. Double Ceres, King of the Scarlets. Brilliant vermilion. 35 cts. per doz., **\$2** pe**r** 100.

Fulgens. Rich, dazzling scarlet. 35c. per doz., \$2.50 per 100.

Boddington's Choice Single Mixed.

20 cts. per doz., \$1 per 100.

Boddington's Choice Double Mixed. 30 cts. per doz., \$1.25 per 100.

St. Brigid. Beautiful Irish-flowered Anemone. Colors from maroon and brightest scarlet to flesh-pink, and from lilac to purple. 75 cts. per doz.,

ANOMATHECA cruenta. pretty, freesia-like plant for pot culture, growing about 9 inches high with scarlet flowers spotted with crimson. 20 cts. per doz., \$1 per 100.

ANTHOLYZA. Similar to gladiolus. Mixed varieties. 50 cts. per doz., \$3 50 per 1.00.

BABIANA. Charming spring-flowering plants for the greenhouse, with dark green-hairy leaves; in habit resembling sparaxis. The colors range from pale lavender and delicate pink to violet and crimson, and are very effective. Plant six or eight bulbs in a 6-inch bulb pan. Mixed varieties, many elegant colors 35 cts. per doz., \$2.25 per 100.

BESSERA elegans. Flower stems from 1 to 2 feet, with loose umbels of beautiful drooping scariet and white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

CALLA Elliottiana. This is the great new Yellow Calla of marvelous beauty. Flowers are large, rich, dark golden yellow, often 4 to 5 inches across the mouth. Leaves are beautifully spotted with white. Bulbs of this variety are very scarce. Extra large bulbs, 50 cts, each, \$5 per doz.

EUCHARIS Amazonica. A splendid hothouse plant, blooming at various seasons. It sends up stalks bearing several pure white, star-shaped flowers 4 inches across; delightfully fragrant and is highly prized as a cut-flower. 25 cts. each, \$2.50 per doz.

LEUCOJUM vernum (Spring Snowflake). Produces flowers like monster snowdrops; very graceful in growth, having the delicate fragrance of the violet. It is one of our earliest spring flowers, with white blossoms distinctly tipped green, handsome in outline and prized for bouquets. They should be grown in quantities in the borders or in spots on the edges of shrubbery, where they are beautifully effective, and when established produce enormous quantities of flowers. They can also be slowly forced

in pots for winter bloom. 25 cts. per doz., \$1.50 per 100.

Aestivum (Summer Snowflake). A white flower resemb'ing the snowdrop, but much larger than the well-known spring favorite. 40 cts. per doz., \$2.25 per 100.

ORNITHOGALUM Arabicum (Star of Bethlehem).
A beautiful variety, throwing up a tall spike bearing numerous large, milk-white, star-shaped flowers, with a black center, and having a distinct aromatic perfume. They are decidedly pretty and interesting when grown in the garden, but are more largely grown for greenhouse and window decoration, being of the easiest culture. Largely forced by florists now for cutflowers. 40 cts. per doz, \$2.50 per 100.

> SCHIZOSTYLIS Coccinea. gladiolus-like flowers and spikes. 50c. per doz., \$3.50 per 100.

> SPARAXIS. Beautiful flowers about 2 inches across, borne on long, graceful spikes; the colors are of the most telling combinations and of the brightest shades. They are tigered, blotched, spotted, streaked and flushed in the most diverse and pleasing manner. The bulbs are not hardy, but do exceptionally well when grown in the conservatory or house in pots or in coldframes, and

> house in pois of in conditiones, and flower during the winter and spring.
>
> 10 Choice Named Varieties. 25 cts. per doz., \$1.50 per 100.
>
> Choice Mixed Colors. 20 cts. per doz.,

75 cts. per 100.

TROPAEOLUM tricololet tube, yellow center, tipped black. The compost in which Tropæolums thrive best is a light rich loam, containing a large proportion of sand. The stems are usually trained on wires, but they may be allowed to fall down from a pot or basket with excellent effect, to form a most attractive tracery of leafage dotted with dazzling flowers. The sunniest part of the greenhouse should be devoted to T. tricolorum, and in potting special care must be taken to secure ample drainage. 20 cts. each, \$1.50 per doz.

WATSONIA (Bugle Lily). It somewhat resembles the gladiolus, but flowers more profusely. It has aroused great interest recently, new varieties being introduced, and is likely to receive considerable attention the part few varieties. siderable attention the next few years. Colors run from pure white to bright red. Large bulbs. Mixed colors. 15c. each, \$1.50 per doz.

Amaryllis vittata Hybrids

Boddington's Collections of "Quality" Bulbs

FOR GROWING IN THE

Conservatory, Greenhouse, or Sunny Window

The following collections of bulbs have been selected with a view to give a prolific variety and an extended time of flowering. The bulbs are imported by us direct from the most reliable firms in Holland and other countries. Purchasers will obtain very satisfactory results from these collections, which, however, cannot be split, but must be bought individually in their entirety. In the general list of "Quality" bulbs, descriptions will be found, and from these you can order "one to a thousand" as your wants may require.

"LENOX" COLLECTION, \$20.00

- 50 Crocuses in named sorts.
- 50 Single Snowdrops. 25 Pottebakker Tulips (Scarlet).

- 12 Double Tournesol Tulips.
 12 Chrysolora Tulips.
 12 White Potteb kker Tulips.
- 12 Duchesse de Parma Tulips. 12 Keizerkroon Tulips.

- 12 Couronne d'Or Tulips. 12 Joost van Vondel Tulips.

- 12 Silver Standard Tulips.
 12 Murillo Tulips.
- 12 Rex rubrorum Tulips.

- 6 Narcissus Paper White grandiflora.
- 12 Single Sweet-scented Jonquils.
- 12 Single Snowdrops.
- 12 Crocuses
- 12 Artus Tulips.

- 6 Yellow Prince Tulips 6 Double Tournesol Tulips.
- 6 La Reine Tulips.
- 6 Freesias.

seedlings should be grown on to the flowering stage without any check whatever. When grown cool the results are most satisfactory. Boddington's Gigantic Cyclamen are unequaled for size or quality of bloom. A magnificent strain of Cyclamen with flowers of extraordinary size and substance.

Gigantic White Butterfly. Pure white; immense flowers. Gigantic White. The largest of all white Cyclamen. Gigantic Cherry-Red. Most brilliant and effective.

Gigantic Rose. Immense flowers of a pleasing shade of light rose.
Gigantic Pink. Exquisite shade of soft pink.

Gigantic Crimson. Most striking color; under artificial light appears to be almost luminous.

Gigantic Crimson and White. A magnificent flower of the largest type. Any of the above varieties, pkt. 50 cts.; 100 seeds \$2.25

Gigantic Mixed. A mixture of all the above varieties in proper proportion. Pkt. 50 cts., 100 seeds \$2.

PRINCESS MAY. A very pretty type of Cyclamen. Color pink, with suffused blotches of crimson at base of petals. Pkt. 50 cts., 100 seeds \$2.25.

SALMON QUEEN PINK. Undoubtedly the most distinct and beautiful color found in Cyclamen. Habit good and foliage handsomely marked. Pkt. 50 cts., 100 seeds \$2.25.

Four Grand Novelty Cyclamen

Cyclamen Persicum giganteum Salmonium. A new color for Cyclamen,

being of intense salmon color; also good habit. Pkt. 50 cts.

Cyclamen Persicum giganteum Salmonium splendens. Similar to the foregoing, only color more unique and intensified. Pkt. 50 cts.

Cyclamen Persicum giganteum, Rococo. The flowers, which are beautifully fringed, measure 5 inches in diameter, are borne on straight, upright stems.

Pkt. 50 cts. Cyclamen Persicum giganteum Bush Hill Pioneer. A beautiful new feathered Cyclamen in various colors. Pkt. 50 cts.

MAJESTY MIGNONETTE

Greenhouse Matured Seed

The grandest of all Mignonettes for indoor forcing. Easy to grow; strong constitution and throwing up a quantity of flower spikes which grow to an immense size. The lateral shoots, too, are as large as many Mignonettes now grown under glass. The seed we offer has been saved for us by a leading grower of Mignonette who makes a specialty of this useful cut-flower for the New York market, from selected spikes only, under glass. Half pkt. 60 cts., pkt. containing about 500 seeds, \$1.

ANTIRRHINUM (Snapdragon). See page 38

VARIOUS WINTER STOCKS

QUEEN ALEXANDRA. A splendid new variety of the Beauty of Nice type, with flowers of a delicate rosy lilac, a tint of incomparable beauty, and for cut and bouquet work of exceptionally good value. The plant throws up a strong center spike about a foot in height, surrounded by numerous side shoots, all loosely clad with beautiful large blossoms. The percentage of doubles is also very high, and a most valuable feature is that the seed-lings come very quickly into bloom. Pkt. 50 cts.

Empress Elizabeth. Bright carmine. Pkt 25 cts.

Princess Alice (Cut-and-Come-Again). White. Pkt. 25 cts.

Beauty of Nice (Daybreak). Pkt. 25 cts.

SCHIZANTHUS

Grandiflorus Boddingtonii, Boddington's Select Hybrids. (Novelty.) This strain is superior to any of the Schizanthus in cultivation, the flowers are better shaped and the colors are more varied. In habit the plants are very bushy, and the flowers are invaluable for cutting; as a pot-plant for conservatory decoration they are unequaled. 75c. per pkt. Wisetoniensis. The colors are varied, ranging from white with yellow center to pink with brown center. Most useful as a winter plant, and should be given a place in every

greenhouse. Pkt. 50 cts.

SWEET PEAS For Christmas Flowering

Boddington's Christmas Early Pink. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in latter part of August flowers can be cut from Thanksgiving on during the winter mor.ths. \$1.25 per lb., 15

Boddington's Christmas Early White. A companion to Christmas Early Pink. Just as free and profuse a bloomer, and is, without doubt, the finest early white for indoor planting. \$1.50 per lb.,

20 cts. per oz.

Rhodanthe Manglesi

(STRAW FLOWER)

A little-known plant, but very largely grown for the London Covent Garden Plant Market. Sow in 5- or 6-inch pots, and thin out to about ten plants An intermediate temperature is all it requires. A most beautiful and attractive plant, plnk or white. Each, 25c. per pkt.

New Giant Sweet Sultans

(Centaurea Imperialis)

This new Centaurea represents the best that has been produced in these beautiful summer-blooming plants. The bushes are about 3 feet high, and are covered with large flowers of the form and fra-grance of Centaurea Margaret. They are forced very extensively under glass by florists in the vicinity of New York.

Pure White. One of the best white flowers for cutting; large, sweet and beautiful.

Favorita. Brilliant rose.

Graziosa. Intense dark lilac.

Splendens. Dark purple. Splendens. Dark purple. Variabilis. White, marked pur-

Armida. Very delicate color; pink, with white tinge.

ple, fading to rose. Price of any of above kinds, 10 cts. per pkt., 40c. 40c., \$1.50 per oz.

BELLIS PERENNIS (Double Daisy). See page 38

Schizanthus grandiflorus Boddingtonii (see page 36)

Rhodanthe Manglesi

Boddington's "Quality" Giant Pansies

For Late Summer and Autumn Sowing

Boddington's "Challenge." This mixture contains all the finest Giant strains of the leading Pansy specialists in the world—the Giant self colors, the Giant striped and margined, and the Giant blotched—all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A gardener who has grown it said, "Why don't you call it Defiance?" 50 cts. per pkt., \$2.50 per ½0z., \$8 per oz. For other choice varieties of Pansies to name and color, see our Spring Catalogue.

Impatiens Holstii

It forms bushes 1 1/2 to 2 feet high, and resembles in habit, foliage and shape of flower, which is much brighter red, the popular Sultani. Trade pkt., 25 cts.

Lupinus Polyphyllus Aureus

Flowers a fine clear yellow, a new color in the perennial Lupines, and a very striking novelty. 50 cts. per pkt.

Nicotiana Sanderae Hybrids (Novelty)

These superb new forms have been obtained by crossing Nicotiana Sanderæ with N. alata and N. sylvestris. The flowers are as large as the carmine variety introduced last year, and are borne in equal profusion. They come in eight separate colors, ranging from pure white to deep scarlet, some of the intermediate tints being of exquisite beauty. Collection of eight varieties, 35 cts.

Hardy Perennial and Old-Fashioned Flowers

THAT CAN BE PRODUCED FROM SEED SOWN IN LATE SUMMER AND FALL

Cultural Directions. Perennial seeds sown in the late summer and fall will flower the following year—spring, summer or fall, according to the variety.

The **seed** should be sown carefully, the same as any choice seed, in **well-drained pots**, or **shallow boxes** or **pans**. Soil should be light and fairly rich, with about one-eighth coarse sand added; after sowing cover lightly with well-sifted soil.

When plants have become large enough to handle, "prick out" about 2 inches apart, more if you have the room, in shallow boxes or frames, and again when large enough; set out in the open in well-prepared ground. If this is done in the fall, the young plants should be lightly covered with leaves or short stable manure; this will act as a slight protection, and will be conducive to their thriftiness and next season's growth.

LAWN GRASS SEED

The "Lenox" Formula ALL NOXIOUS WEED SEEDS

This mixture is composed of fine-leaved dwarf-growing grasses, all of the highest quality recleaned seed. With proper preparation of the soil before sowing, it will produce a rich velvety lawn, which will remain green throughout the year. This mixture has produced some of the most famous lawns in Lenox, Mass. I recommend sowing four bushels of seed to the acre. One quart of seed will sow 15 x 20 feet (300 square feet), one bushel 100 x 108 feet (10,800 square feet).

Price, qt. 25 cts., pk. \$1.25, bus. (20 lbs.) \$4.50

BODDINGTON'S SPECIAL "PUTTING GREEN" MIXTURE

The finest low-growing grasses are contained in this mixture, producing a lasting green turf that will withstand hard wear and tear.

Price, qt. 35 cts., pk. \$1.50, bus. (20 lbs.) \$5

BODDINGTON'S MIXTURE FOR SHADY LAWNS

A mixture of fine grasses adapted for growing in the shade and under trees.

Price, qt. 35 cts., pk. \$1.50, bus. (20 lbs.) \$5

BODDINGTON'S "TERRACE MIXTURE"

A mixture of strong, deep-rooted grasses for banks and terraces, that will prevent washing away during heavy rains.

Price, qt. 35 cts., pk. \$1.50, bus. (20 lbs.) \$5

MUSHROOM SPAWN

TISSUE-CULTURE PURE SPAWN

This name tells just what it is. Absolutely pure cultures of Mushroom Spawn grown from the tissue of selected Mushrooms. It required the knowledge of a Mushroom grower, the skill of a spawn producer and the training of a bacteriologist and a plant physiologist.

The superiority of Tissue-Culture Pure Spawn is made possible by improved methods in making pure cultures, and careful and systematic selection. It has these merits: (1) All the advantages of a Virgin Spawn. (2) Improved varieties—varieties giving greater yields and better Mushrooms—varieties that have a habit of doing these things. (3) Pure strains of distinct sorts. No "chance" sorts of uncertain value. (4) It grows. It's alive. I send out nothing but fresh Spawn.

VARIETIES OF THE FIELD MUSHROOM (Agaricus campestris)

ALASKA. Smooth white cap; above medium size.

BOHEMIA. Brown cap, with very firm, thick meat; forms large, well-shaped buttons; excellent flavor and a good shipper.

COLUMBIA. Very large, velvety cap; almost pure white; firm, fine flavor and very attractive.

(Agaricus villaticus)

GALLOWAY. Large Mushroom, almost white, firm flesh, thick stem and fine flavor. Forms very large, regular buttons. A heavy cropper.

October 28, 1905
The Culture Mushroom Spawn you sent me some time ago is very satisactory.

(Signed) Theodork Wirth,
Superintendent Hartford Parks

Tissue-Culture Pure Spawn comes in cakes or bricks of a specially prepared compost that gives the greatest amount of active Spawn per cubic inch of cake. The new cakes are rectangular 9 x 5 x 1 ¾ inches, light, clean, and do not contain a surplus of loam. In spawning the bed we recommend that the cake be broken into about twelve to fifteen pieces and the latter be placed 8 to 10 inches apart in the bed. Each cake will spawn 8 to 10 square feet of bed.

100 cakes or more, \$15 per 100; 50 cakes or more, 18 cts. per cake; 25 cakes or more, 20 cts. per cake; 5 cakes or more
25 cts. per cake. One cake or more sent prepaid, 35 cts. each

Note.—The cakes weigh about one and one-half pounds, so that the price per hundred pounds is approximately \$10.

BODDINGTON'S PURE CULTURE MUSHROOM SPAWN

Produces Mushrooms Superior as to Quality and Size and more surely than any other Spawn

Pure Culture Mushroom Spawn. The "new idea" is no longer in the experimental stage. The largest growers of Mushrooms (and growers of large Mushrooms, too), use the Pure Culture Spawn in the West and Northwest.

Pure Culture Mushroom Spawn is propagated by a scientific process direct from varieties selected for size and prolific bearing. By this new process, the chances of the spawn becoming "dead" and the crop a failure are largely eliminated.

In **Pure Culture Mushroom Spawn** the idea of improvement has been carried out, as in the improvement of all the vegetable kingdom, with regard to cropping and fitness for market purposes; and the difference is as noticeable, in comparison with any "wild" variety to a set and cultivated type now generally recognized, whether it be a fruit, flower or vegetable.

Price of Boddington's Pure Culture Mushroom Spawn, 20 cts. per Ib., \$1.75 for 10 lbs., \$15 per 100 lbs.

ENGLISH MILLTRACK MUSHROOM SPAWN

Fresh from the most celebrated maker in England. Made in bricks. 10 lbs. will spawn 10 feet square.

15 cts. per lb., \$1 for 8 lbs., \$10 per 100 lbs.

Get out of the ruts! It doesn't cost a cent more to grow good Mushrooms from good spawn. It does make much difference in the returns

You should not be content with less than one pound of Mushrooms per square foot of bed. Some people get two with CULTURE MUSHROOM SPAWN.

Twelve Mushrooms. Weight, 4 pounds Grown from Tissue-Culture Pure Spawn by Mr. J. B. Swayne, Kennett, Pa.

I have many calls and inquiries with regard to the growing of Mushrooms, but, owing to the somewhat lengthy cultural directions, I am unable to place them in my Catalogue. I take pleasure in recommending to your notice the most practical work ever published, "How to Grow Mushrooms" (Falconer). \$1 prepaid.

Selected English Pot-Grown Grape-Vines

Bunch of Grapes, Foster's Seedling Weight, 7 lbs. Grower, Wm. Turner, Oceanic, N. J.

Owing to the scarcity of these in American-grown stock, I have made arrangements with one of the leading English growers for a supply. While the prices at first glance may appear high, the strength, size and quality of this stock is so much superior that comparison cannot be made with the light canes usually sent out. I offer the following, but shall be pleased to furnish a list of other sorts that can be supplied. Orders must reach me by March 1.

BLACK VARIETIES

Alnwick Seedling. An excellent late variety. Barbarossa. Berries round and large, bunches of immense size; late. Black Alicante. Bunches medium, berries very large. Black Hamburgh. The most useful and popular Grape Black Muscat, or Muscat Hamburgh. Excellent and richly-flavored Grape.

Diamond Jubilee. Berries large, oval; late. Gros Colman. A very handsome Grape, berries and bunches of enormous size; hangs very late.

Lady Downe's Seedling. One of the best late Grapes.

Madresfield Court. Berries very large, of rich flavor.

WHITE VARIETIES

Buckland Sweetwater. A large, handsome berry and bunch; a good bearer and excellent.

Duke of Buceleuch. A large-berried, fine, early variety.
Foster's Seedling. A fine Grape; sweet flavor.
Frontignan White. Fine white Grape; abundant bearer.
Muscat of Alexandria. Flesh firm and rich, berries large; a superb variety;

Strong 2-year-old planting canes\$3 25 \$35 00 Strong fruiting canes.....

River's English Pot-Grown Peaches, Nectarines, Figs and Other Fruit Trees

I import these plants on advance orders only, from the best and most reliable grower in England. Stock can be relied upon as being absolutely true to name. Catalogue of varieties on application.

A Select List of Small American and Other Fruits

CURRANTS

Fay's Prolific. Color rich red; the leading variety for home use. Cherry. Deep red.

White Grape. Best white variety.

Wilder. A new red variety; fruit large, of fine flavor. Black Naples. The favorite sort for preserving.

Any of the above, 10 cts. each, 75 cts. per doz., \$6 per 100

RASPBERRIES

Columbian, Cumberland, Miller's Red, Gregg, Marlboro, Souhegan or Tyler, Cuthbert, Kansas, Golden Queen.

Any of the above, 75 cts. per doz., \$3 per 100

BLACKBERRIES

Iceberg. White berries, 60 cts. per doz., \$4 per 100. Rathbun. A fine jet-black variety. 60 cts. per doz., \$4 per 100. Wilson Junior, Erie, Early Harvest, Kittatinny, Snyder. 50 cts. per doz., \$2.50 per 100, \$15 per 1,000.

GOOSEBERRIES

Columbus, Industry, Red Jacket, The Pearl. Any of the above, 20 cts. each, \$2 per doz., \$15 per 100

BODDINGTON'S SELECTED DOZEN HARDY GRAPES

Agawam (Rogers' No. 15). Large, dark red, sweet.
Brighton. Resembles Catawba, with richness of the Delaware.
Campbell's Early. An improved Concord; very early.

Catawba. Red, sweet and rich, with pleasant musky flavor.
Concord. The most popular black Grape; succeeds everywhere.
Delaware. Light red, sweet, sprightly; fine flavor.
Lindley (Rogers' No. 9). Large, black, good quality.
Moore's Diamond. Delicate greenish white, with rich yellow tinge. Prolific, early and hardy; of fine quality.
Moore's Early. Large, black, good quality.
Niagara. Berries large, light greenish white, slightly ambered.
Pooklington. Runch and berry large, golden yellow.

Pocklington. Bunch and berry large, golden yellow.

Worden. Black, hordy, healthy, of fine quality.

Strong selected 2-year-old vines, 25 cts. each, \$2.50 per doz., \$15 per 100

A SELECTED LIST OF POT-GROWN STRAWBERRY PLANTS

August Luther. Extra-early; perfect. Bederwood. Early; perfect flowering.
Brandywine. Midseason to late; perfect

Howering.

Howering.

Midseason; pistillate. Clyde. Early; perfect flowering.

Excelsior. Extra-early; perfect. Gandy. Late; perfect flowering.

Ideal Tree and Plant Labels

The Ideal Copper Plant and Tree Labels

The above Labels, wired, are made of copper, "lead-capped," that is, the outside edge is reinforced with lead, making them very strong and handsome, and practically imperishable. No. I can be written on with a stylus or ordinary pencil. No. 2 is embossed with the name of the rose, and I can furnish nearly every variety of note.

No. 2, with rose name embossed..... 2 50

INSECTICIDES. FUNGICIDES.

Bordeaux Mixture. For destroying fungus on grapes, etc. 1-lb. box 20 cts., 4 lbs. and over at 15 cts. per lb., 50-lb. kegs \$6; liquid, qt. 40 cts., gal. \$1.25.

Copper Solution, Ammoniated. A remedy for grape anthray and mildew apple.

anthrax and mildew, apple scab, carnation and violet rust. One quart of solution to 25 quarts of water. Qt. \$1.

Fir Tree Oil. Death to mealy bugs, red spider, greenfly and all other insect pests. Half pint to 10 gallons of water. Pt. 75c., qt. \$1.40, ½gal. \$2.50, gal. \$4.25. Flour of Sulphur. The best

preventive for mildew on roses, grape-vines, etc., either in- or out-of-doors. Lb. 10 cts., 10

lbs. 60 cts., 25 lbs. and over at 5 cts. per lb. Gishurst's Compound. A preparation for preventing and destroying red spider, mealy bug, greenfly, etc. 50 cts. per box.

Hammond's Grape Dust. A powder

especially prepared to kill rot and mildew on grapes, etc. 5-lb. package 35 cts., 100-lb. keg \$5.50.

Hammond's Slug Shot. Lb. 10 cts.,

5-lb. package 30 cts., 10-lb. package 50 cts., 100 lbs. \$4.50.

Hellebore, Powdered. An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 ounce to 3 gallons. 2-lb. box 35 cts., r-lb. box 20 cts, ½-lb. box 12 cts.

Kerosene Emulsion. For plant lice

of any kind, cabbage worm, scale insects on app'e, pear and other trees. Excellent as a preventive

against San José scale and other equally dangerous pests. Qt. 50 cts., gal. \$1.25, 5 gals. \$5.50.

Lemon Oil. For destroying mealy bugs, scale, thrip, red spider, etc. Directions on cans. Qt. 75 cts., 1/2 gal. \$1.25, gal. \$2 25, 5 gals. \$10.

Nicoticide. Fumigating compound. A certain destroyer of all greenhouse bugs. Directions on packages. Pt., sufficient for 32,000 cubic feet, \$2.50 each. Fumigators for same, 75 cts. each.

Nikoteen. A thorough exterminator of mealy bug, thrip, lice and all injurious insects affecting plant life. Pt. bottle \$1.50.

Paris Green. Unexcelled for the destruction of potato bugs and other insects that eat foliage. Lb. 25 cts.

Nico Fume. Positively the strongest tobacco paper on the market; does not injure blooms, and furnishes the easiest method of fumigation ever devised. Packed in

tins, 24 sheets 75 cts, 144 sheets \$3.50, 288 sheets \$6 50.

"Rose Leaf" Tobacco Extract. A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Pint cans 30 cts., qt. 50 cts., gal \$1.25.

Tobacco Dust. Made from tobacco

stems. Lb. 10 cts., 10-lb. package 65 cts., 100 lbs. \$3.

Tobacco Stems. For fumigating

plants to destroy insects in hothouses, etc. In bales of 100 lbs.

\$1.75, 300 lbs. \$4.50. Whale Oil Soap. For destroying insects on plants, vines, etc. Lb. 18 cts., 3-lb. box 40 cts.
Weed Destroyer, "The Acme."

This is the best herbicide for killing weeds in driveways, walks and gutters. Put up in tins in powdered form, dissolving quickly

in water. No. 1, to make 25 gals., \$1 per tin; No. 2, to make 50 gals., \$1.50 per tin; No. 3, to make 100 gals., \$2.75 per tin.

X. L. All Liquid Insecticides. For spraying. English preparation; purely nicotine; harmless to very delicate plants; kills mealy bug, red spider, and all insect pests. Pt. 65 cts., qt. \$1, 1/2 gal. \$1.75, gal. \$3.50.

Thompson's Special Top-dressing for Chrysanthemums

A top-dressing of unusual merit, used almost exclusively in the British Isles and Europe by the leading Chrysanthemum growers and prize-winning exhibitors of the Chrysanthemum, and now being used by the leading growers in the United States and Canada. This manure is commanding large sales yearly.

Price, 10 lbs, \$2, 25 lbs. \$4.50, 56 lbs. \$7.50, 112 lbs. \$14

THE CHRYSANTHEMUM BY ARTHUR HERRINGTON

The most practical book on the Chrysanthemum ever written. Tells about the "unrooted cutting" to the flower for the exhibition table. Price, 50 cts., postpaid.

FERTILIZERS

Bone Meal (Pure Ground). Especially prepared for greenhouse purposes. 10 lbs. 50 cts, 100 lbs. \$2.50, 200 lbs. \$4.50, ton \$36. Bone, Coarse Crushed. For grape-vine borders, etc. 100 lbs.

Blood and Bone. Invaluable for garden and field crops, grape-

vines, etc. 100 lbs. \$2.50, ton \$40.5 Canada Hard Wood Ashes (Unleached). Unequaled for lawns and fruit orchards, permanently enriching the soil and driving away insects. Indispensable for all crops requiring potash.

200 lbs. \$3, ton \$22, 50.

Clay's Fertilizer. Unquestionably one of the best manures for all purposes, either in greenhouse or garden. It is productive and lasting. Notwithstanding its apparent high price, it is quite economical. 56-lb. bag \$4, 112-lb. bag \$7.

Guano, Ichthemic. An ideal plant-food. Largely used in England in both garden and greenhouse. 28 lbs. \$2.50, 56 lbs. \$4,

112 lbs. \$8.

Guano, Peruvian. 10 lbs. \$1, 50 lbs. \$3, 100 lbs. \$5.50.

Horn Shavings. Largely used for orchids and flowering plants.

50 lbs. \$3, 100 lbs. \$5.

Land Plaster, or Gypsum. Excellent for such crops as require lime and sulphates. 250 lbs. \$2, ton \$15.

Muriate of Potash. Used as a general stimulator for soils.

50 lbs. \$2.50, 100 lbs. \$4.

Nitrate of Soda. Largely used for top-dressing lawns and for greenhouse purposes; the most powerful fertilizing stimulant.
10 lbs. 50 cts., 100 lbs. \$3.75.

Sheep Manure (Boddington's Red Seal Brand) Pulverized.

Prepared for use by a patent process which destroys all weed seeds and at the same time preserves the fertilizing properties indefinitely. 100 lbs \$2, ton \$35.

Scotch Soot. A splendid fertilizer, adding luster to the foliage,

as well as a remedy against slugs, grubs and cut-worms.

roo-lb. bags only, \$5 per bag.

Salt. For top-dressing asparagus, etc. Bag of 100 lbs. \$1.25.

Thomson's Vine, Plant and Vegetable Manure. The result of many years' practical experience, used very largely of late years

for top-dressing grape borders. 112 lbs. \$7, ½ ton \$47.50, ton \$90

Mapes' Fertilizers. These high-grade fertilizers are well known throughout the United States. They are composed chiefly of bone, no rock being used in their composition. We shall be pleased to mail Mapes' catalogue, giving analyses, etc., free on application

Complete Potato Manure. Bag of 200 lbs. \$4 50, ton \$43.

Vegetable Manure, for all Soils. Bag of 200 lbs. \$4.50, ton \$43.

Fruit and Vine Manure. Bag of 200 lbs. \$4.50, ton \$43.

Complete Manure. "A" brand for general use. Bag of

200 lbs. \$4, ton \$38.

An English Cyaniding Apparatus Fig. 1

Fig. 2

Fumigating by Hydrocyanic Acid Gas

For some months there has been a considerable amount of correspondence in horticultural journals regarding the use of hydrocyanic acid gas as a fumigant for destroying insects. The writers generally are agreed upon its merits, but several deprecate its use on account of the danger to the life of the operator.

Mr. F. C. Edwards, nurseryman and seedsman, Warehouse Hill, Leeds,

has now invented a cyaniding machine which practically removes all danger and makes cyaniding a very simple operation with no risk to the operator, as he is outside the house when the gas is generated, providing the instructions given with the machine are adhered to. The two diagrams which we reproduce from drawings show the simplicity of the invention. To begin, the machine should be suspended from the roof of the greenhouse, then pour into the bowl the requisite quantity of water and sulphuric acid, and it is essential to bow the requisite quantity of water and suppuric acid, and it is essential to pour in the water first, thereafter add the sulphuric acid and stir with a stick until mixed, and place the bowl in the machine as in Fig. 1. The scoop above the bowl is then placed in position and is kept level by means of a lever, to which a string is attached. At this point the other end of the string must be taken outside the house. It may be taken under the door or through the keyhole, or through a ventilator, as is most convenient to the operator or plan

leave the house. the string gently to re-lease the lever, when lease the lever, when generate. Mr. Edwards says two kinds of cyanide may be used—potassium and sodium—but from exhaustive experiments to be a lease the lever, when Fig. 2, and immediately generate. Mr. Edwards says two kinds of cyanide may be used—potassium and sodium—but from exhaustive experiments to be a lease the lever, when

sodium-but from exhaustive experiments he finds sodium cyanide in every way preferable to potassium. This cyanide may be used from half an ounce to two ounces per 100 cubic feet, according to the nature of the plants and insects to be fumigated.

We are the sole agents in the United States and Canada for this machine and offer it as follows: \$2.75 each; sodium cyanide, \$1.50 per lb.; glass measures, 50 cts.

The Newport Nozzle-Sprayer

This sprayer is undoubtedly the best article of its kind ever placed upon the market. The "spoon" is adjustable. With a screw-lever (see Fig. 1) the spray can be made as fine as dew, or with the force and strength of a pelting rain. Excellent for "getting under" foliage of roses, palms, etc., where force is needed to keep down red spider, etc. Price, made of brass, \$1 50 each, \$15 per doz.

Fig. 1 shows adjustable screw-lever of Newport Nozzle-sprayer. Fig. 2 shows "speon" of Newport Nozzle-Sprayer.

The Tye Hyacinth Glass

We recommend the Tye Hyacinth Glass (as the tall ones are apt to topple over) in the following colors: Crystal, amber, amethyst, blue and green 25 cts. each, \$2.50 per doz.; or one of each color (5) for \$1.

OUR TERMS

RICES named herein are subject to the following discounts: Five per cent allowed, to be deducted when cash accompanies order. To customers of approved credit, accounts are payable 30 days from date of invoice, except where special prices and terms are arranged for. Grass, Grain, Clover Seed, Implements, Fertilizers and Insecticides are subject to no discount whatever, but are strictly net cash.

ORDER EARLY.—It is very important that you should send your orders as early as possible on receipt of this Catalogue. We aim to ship all orders the same or next day after receipt, but during the busy season it is almost impossible, hence the importance of ordering early.

WE NEVER SUBSTITUTE without authority from our customers. As the season advances, however some stocks "run out," and it is sometimes impossible to procure. If, however, you give us permission to substitute, please state so in your order, and we will use our knowledge and ability to send goods of equal merit, usefulness and value.

PRICES.—As it is impossible to predict the exact demand, our prices are made subject to change without notice, and goods being unsold when order reaches us. We, however, carry very large stocks, and, if order reaches us in good season, full satisfaction may always be expected.

C. O. D. orders can be sent only by express. Such orders should be accompanied by a remittance in part payment to guarantee charges.

20 Per Cent Reduction in Express Rates

Under the ruling of the leading express companies, Plants, Bulbs and Seeds, packed in closed boxes or baskets, will now be carried at the "GENERAL SPECIALS" rate. This rate means a reduction of 20 per cent from the regular merchandise rates to all points where no "General Specials" exists. To points where a "General Specials" rate is in force, the companies make a special reduction. Shipments weighing less than 100 pounds receive the benefit of the rate per 100 pounds, but the minimum charge is 35 cts. For instance, where the regular merchandise rate is \$4 per 100 pounds, a box of plants or bulbs weighing 100 pounds will be carried for \$3.20, a saving of 80 cts. on one shipment.

<u>CLUB ORDERS.</u>—No smaller quantities will be supplied than those quoted in the list, except that three bulbs will be furnished at dozen price, 25 at 100 price and 250 at 1,000 price; but it is suggested, where these quantities are too large, that two or three friends or neighbors could combine their orders with advantage and save transportation charges.

NON-WARRANTY.—We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out, nor do

we guarantee the successful flowering of seeds, bulbs or plants, or that the same will be free from disease. If not accepted on these terms, the goods must be returned at once, and any money that has been paid for same will be refunded.

ARTHUR T. BODDINGTON.
